# MARK MATIS

Texas A&M Student

## PROFILE

Howdy!

I am a computer science student at Texas A&M University. I have an interest in a myriad of different fields, both those that are related to my major and those that are not. More than anything, I love to learn and experience new things. I not afraid of hard work and pick up new skills quickly. I am working on a Master of Finance as I get my undergraduate computer science degree.
